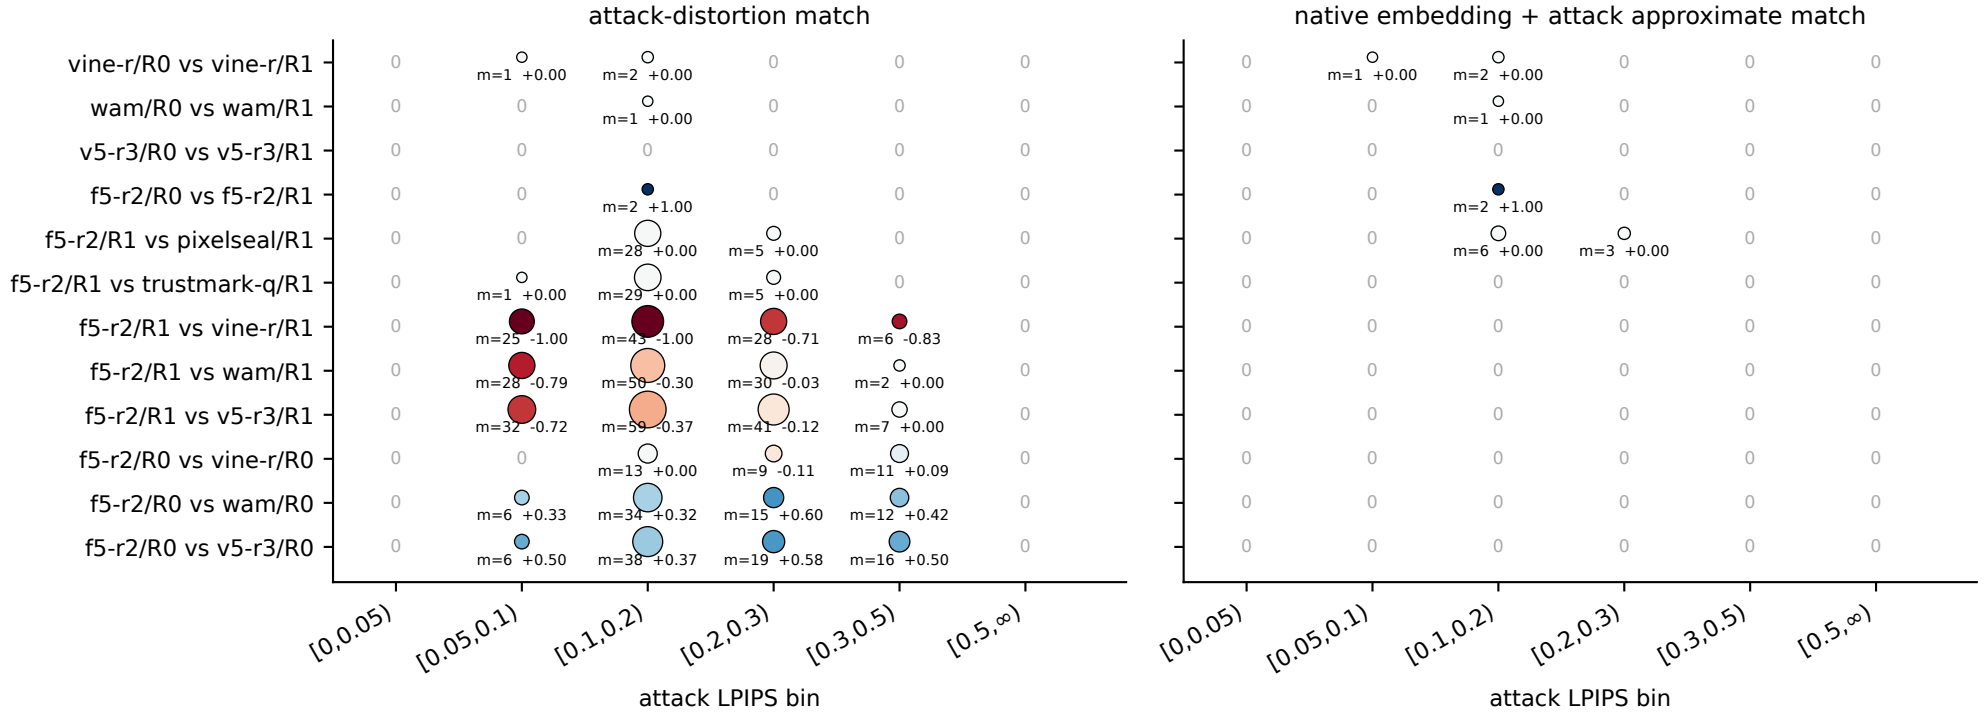
Figure 4. Matched-bin paired difference (left − right successes)/m, with overlap m/60; grey 0 = empty bin, not estimable; no pooled effect, no tests



Marker area grows with m; colour: blue = left arm succeeds more, red = right arm succeeds more, white = tie. Each side's candidate strengths are .1, .2 and .4 (all run; TrustMark Q and Pixel Seal: .2 only), so a selected pair may join different strengths.
