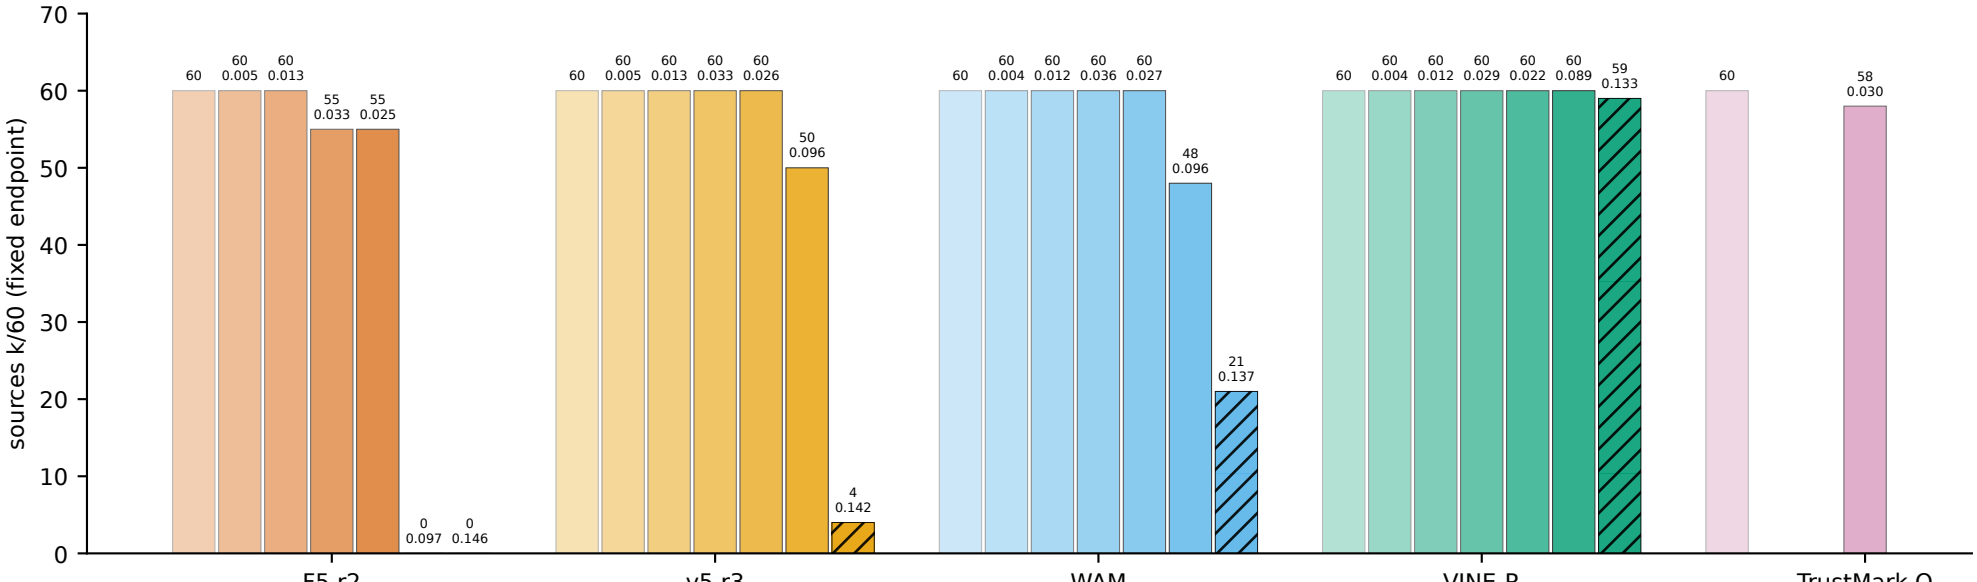
Figure 6. Deterministic controls and the rinse against their parents (controls: one output per source; R1 .1 and rinse: source majority of three seeds)



Bars per arm, left to right: clean, X1, X2, D1, D3, R1 .1, R1 rinse (gaps are out of scope). Label: k, then the median attack LPIPS. R1 .1 is the rinse's parent (first pass); the hatched rinse bar is its second .1 pass, with LPIPS against the original mark. Pixel Seal is clean and R1 .2 only.
